

NURSERY POTTING SOILS; SOILLESS MEDIA

General Information

DESCRIPTION

LEONARDITE is a commercial fertilizer which contains humic acid. Leonardite results from the decomposition and compression of organic plant materials. Humic acid may aid in uptake of micro nutrients.

Limitations, Restrictions, and Exceptions

NURSERY POTTING SOILS; SOILLESS MEDIA

- Incorporate 1/4 lbs of Leonardite per 4 cubic feet bag or 6.75 lbs per cubic yard of soilless media or nursery potting soil.
