

AIR APPLICATION

General Information

DESCRIPTION

MICRO NUTRIENTS is designed to supply nutrients efficiently to vegetable crops, field crops, row crops, deciduous fruit and nut trees, grapes and citrus. Foliar fertilization is intended as a supplement to a regular fertilizer program and may not by itself provide all the nutrients normally required by agricultural crops or other intended plants. May also be water run using rates similar to foliar use rates.

Limitations, Restrictions, and Exceptions

AIR APPLICATION: Apply 3 to 10 pounds per acre in sufficient water for good coverage. Application may be repeated every 14 days until deficiencies are addressed. Do not apply if temperatures exceed 90F or when plants are under stress. A nonionic spreader is recommended at 1 pint per 100 gallons of water.
