

HORTICULTURE CROPS

General Information

DESCRIPTION

Opti-Gro is a biostimulant that works through multiple active agents and multiple modes of action. Opti-Gro stimulates the indigenous soil microbials to work more efficiently, thus improving the availability of soil nutrients.

GENERAL DIRECTIONS

Apply Opti-Gro by sprayer, or sprinkler, or drip irrigation system. Treat soil at planting and spray plant at flowering and midseason. Apply to soil or foliage at 1 gallon per acre.

Limitations, Restrictions, and Exceptions

HORTICULTURE CROPS: mix 50 oz in 5 gallons of water. Use 1 pint for 1 gallon container and 1 quart for larger container.
