

SOIL APPLICATION

General Information

DESCRIPTION

Opti-Gro is a biostimulant that works through multiple active agents and multiple modes of action. Opti-Gro stimulates the indigenous soil microbials to work more efficiently, thus improving the availability of soil nutrients.

GENERAL DIRECTIONS

Apply Opti-Gro by sprayer, or sprinkler, or drip irrigation system. Treat soil at planting and spray plant at flowering and midseason. Apply to soil or foliage at 1 gallon per acre.

Limitations, Restrictions, and Exceptions

SOIL APPLICATION: Apply 1 gallon per acre in 50 gallons of water. Apply 1% solution with transplants at planting.
